Power Steering Fluid Maintenance

Why Change Power Steering Fluid?

Over time:

- Power steering fluid becomes dirty and breaks down due to heat, pressure in the system, and mileage

Benefits of Power Steering Fluid Service

- Protection against power steering pump failure
- Improves fluid flow and cold weather performance
- Can help reduce and/or prevent noisy pumps

How Often Should Fluid be Changed?

- Follow manufacturer recommendation
- In the absence of manufacturer recommendation, every 36,000 miles
